

**Salina Tree Advisory Board
Regular Meeting
March 21, 2006
Lakewood Discovery Center**

Members Present: John Wachholz, Kathleen Pierson, Nolan Sump, Lloyd Davidson, Susie Marietta, and Quentin McKee.

The minutes were approved as written.

The forestry report included an update on the Legacy Tree Fund. Steve said that there has been 4 donations received already this year and that the increased donation requirement does not appear to have affected the number of donations coming in.

Bob Ash was scheduled to review the tree inventory results with the board, however, he was unable to attend the meeting this month.

Steve also reported that the downtown tree replacement project has begun. The contractor will be grinding stumps and replacing the trees this week. The north Ohio overpass landscape project was reviewed. Steve had a copy of the plan and was able to outline the project for the board.

Arbor Day plans were discussed with Sacred Heart High School participating again this year. 3 trees will be planted along their parking lot with the help of the biology classes. John Wachholz will read the proclamation again this year at the City Commission meeting.
